

Dylan DRAY

+33 6 95 30 07 01 | <https://www.linkedin.com/in/dylan-dray/> | dylan.dray@outlook.fr | <https://github.com/dylandray> | Paris, FR

AI Engineer with international experience (France, Japan, USA), specializing in Machine Learning, Generative AI/LLMs and Data. Clear communication, curiosity, autonomy and strong adaptability in collaborative and cross-cultural environments.

Professional Experience

Bosch Corporation | Tokyo, Japan

May 2025 – Nov 2025

Data Scientist – End-of-study Internship

- **Winner of the excellence prize “Business Impact”** during the annual “Bosch AI Hackathon” (~100 participants)
- **Deployed AI solutions (ML)** in the quality area, 97% anomaly detection accuracy vs. 82% baseline, on 50k+ claims.
- **Optimized** current IT tools, conceived and updated PowerBI dashboards, Pipelines and Python Scripts.
- **Presented complex technical** concepts to Japanese business teams to facilitate strategic decision-making.

Electricité de France (EDF) | Lab Paris-Saclay, Paris, France

Apr 2024 – Aug 2024

Generative AI (GenAI) R&D Engineer – Internship

- **Developed and deployed genAI tools** utilizing both proprietary and open-source models for text and image generation.
- **Fine-tuned large language models** and built retrieval-augmented generation (RAG) prototypes for text and images.
- **Gained in-depth expertise** in Generative AI, Large Language Models, Prompt Engineering, Deep Learning and applications

Education

École Supérieure d'Ingénieurs Léonard de Vinci (ESILV) | Paris, France

Sep 2022 - Apr 2026

Master's Degree – Diplôme d'Ingénieur Data & Artificial Intelligence, Software Engineering

Data sciences, Neural Networks and Deep Learning, Software Engineering, Advanced Data Structures and Algorithms, NLP, Machine Learning, Prompt Engineering, Multimodal Machine Learning, NodeJS and React, DevOps, Probabilities

University of Virginia UVA Wise | VA, United States of America (USA)

Aug 2024 – Dec 2024

International exchange student: Computer science, Software Engineering, Entrepreneurship

Lycée Jean Perrin | Marseille, France

Bachelor's Degree - Classe préparatoire aux grandes écoles (CPGE Maths sup PTSI – Maths spé PT) 2020 – 2022

Two-year undergraduate intensive preparation courses for the entrance exams to top French Engineering schools

Projects

- **Design of a complete Topic Modeling pipeline (collection, cleaning, vectorization) for the semantic analysis of YouTube comments.** Integration of clustering algorithms (BERTopic) and interactive data visualization within a web interface (Python, Flask). <https://github.com/dylandray/topic-modeling-youtube/>
- **Port'on Mask** : Built a Python/OpenCV **computer vision** system on Raspberry Pi for real-time mask detection and masked-face recognition, achieving >85% accuracy under hospital access-control conditions. <https://github.com/dylandray/portonmask>

Some other projects (School projects, website) are visible on my github page: <https://github.com/dylandray>

Skills

Languages: French (Native) | English (Fluent, TOEFL ITP – C1) | Japanese (Intermediate) | Spanish (Conversational)

General Hard Skills: C/C++ | Python (Deep Learning, Machine Learning & Data Science) | C# | SQL
Flask | LLM Fine-tuning (LoRA) | TensorFlow | PowerBI | PyTorch | Hugging Face | Docker

Soft skills: Teamwork | Creativity | Problem Solving | Autonomy | Leadership | Scrum | Ability to simplify complex concepts

Volunteer Experiences

President (2022/2024) @ Leo&Co (Animal welfare association): Grew membership from 7 to 90 members, Organized and led an international humanitarian trip to Morocco.

Partnership Manager (2023/2024) @ Erasmus Student Network Devinci (ESN) : Negotiated 10 partnerships (Merch, activities..)

Member (2021/2024) @ LéolndieGames (Creation of video games): Participated in game jams/courses
